FORENSIC ADAPTER KIT

APPLE

DIFOSE

AFAS

Apple Forensic Adapter and Cable Set

DIFOSE AFAS is an ideal adapter and cable set solution that is required while copying data from commonly used data storage environments. Forensic experts should always carry it with them during incident response and evidence collection.

- Supports all known data storage devices of Apple
- Proprietary MacBook SSD connectors covered
- Thunderbolt, FireWire 800, USB-C and SATA connectivity

WHY AFAS

Built for first responders

Ideal Solution

Presented to first responders and forensic experts as a need-to-have kit for incident response and evidence collection in any environment.

Special Design

With the light of the experience and knowledge of our experts, DIFOSE AFAS is filled with adapters and cable sets for almost all Apple hardware you may encounter.

Powerful Support

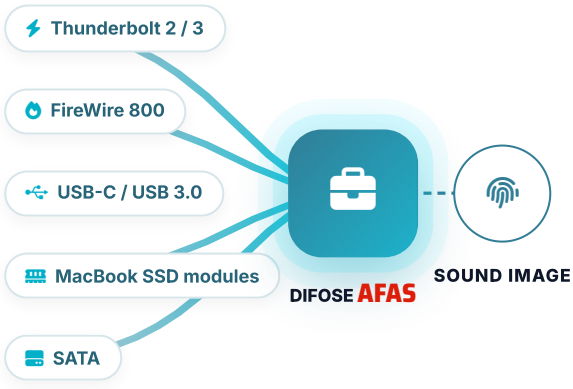

Connection adapters, cables and hand tools that support all known data storage devices of Apple.

THE CHALLENGE

Many Apple connectors, one kit

One of the most annoying topics of dealing with a cyber incident is the necessity to connect forensic duplicators to different types of data storage devices in different environments. Especially with SSD technology, nowadays Apple computer disks may have lots of different connection types.

To acquire a forensically sound image, first responders and forensic experts must have the required connection adapters and cables for Apple computers.

IN THE FIELD

From the scene to a forensically sound image

1

On the scene

Carry DIFOSE AFAS with you during incident response and evidence collection.

2

Identify the interface

Apple disks — especially SSD modules — may have many different connection types.

3

Connect the duplicator

Use the right adapter or cable to connect your forensic duplicator to the device.

4

Acquire a sound image

Obtain a forensically sound image of the evidence.

COMPATIBILITY

What DIFOSE AFAS connects to

Apple SSD modules

Proprietary MacBook SSD connectors

- MacBook Air 6+12 pin
- MacBook Pro Retina / Air 7+17 pin
- MacBook Pro / Air / Retina 8+18 pin
- MacBook / Pro / Retina / Air 12+16 pin

Apple ports

Thunderbolt and FireWire generations

- Thunderbolt 2
- Thunderbolt 3 (USB-C)
- Thunderbolt
- FireWire 800

Standard interfaces

Everyday host and disk connections

- USB 3.0
- USB Type-C
- SATA
- HDMI

Apple platforms

Covered device families

- MacBook
- MacBook Pro
- MacBook Air
- MacBook Retina
- iPod
